Braun Lowered Floor Power Conversion performed by Braun before delivery to Performance Mobility.

Performance Mobility modification – to be performed in Portland Oregon with final delivery and all service out of Eugene location. Will require 2-3 fittings in Portland with [REDACTED]

- Remote control keyless entry (included on vehicle)
- Power kneeling (included in Braun conversion)
- Power side door (included on vehicle)
- Lower Floor with slightlier of 47" (included in Braun conversion)
- Power in Floor ramp with door entry height of at least 56" (included in Braun conversion)
- Powered rear hatch (included on vehicle)
- EZ Lock in front driver position
- EZ Lock front stabilizer
- Driver manual release for EZ lock
- Drive seat belt
- Rubberized flooring
- MPS Right angle hand controls
- Palm quad grip mounted on hand controls (to maintain [REDACTED] hand on the hand controls while driving)
- Tri Pin spinner knob with 2 switches for turn signal mounted per [REDACTED] preference (wireless)
- Zero effort steering with backup
- EMC option B touchpad with flush side panel versus beveled to allow [REDACTED] to access the push button system secondary to poor coordination. Secondary controls to include: wipers, remote start, smart shift controls, ignition start, headlights, electronic park brake, and cruise control on/off and set. Pad to be mounted to the right side of the steering wheel
- EMC electric brake
- EMC Smart shift
- EMC Remote start interface
- Pedal guard
- Digitone to access secondary controls while driving. Will access the Digitone using [REDACTED] left elbow with button located on the driver's door
- Aux battery (for vehicle)
- Manual gas door release strap
- Custom built station for arm support as needed
- [REDACTED] will need to wear [REDACTED] headrest on [REDACTED] wheelchair for safety (This is to be done by wheelchair vendor. Not included)
- Final fit and finish assessment of equipment upon installation by CDRS.
