Visitors Welcome

*A special thank you to everyone who purchased
cattle for us this past year!*

Schmig Simmental Ranch

Welcome to our 38th Annual Production Sale. Thyen Farms will again be a guest consignor.

As you all know, 2020 was a year filled with so much uncertainty and even now we don't know what to expect for the bull sale. We will just try to carry on as usual and hope for the best. The weather has not been too bad so far and that is a positive at least!

On February 9th we clipped, weighed, measured scrotal circumference and gave the first foot rot vaccinations. The scrotal measurements listed are the actual numbers.

The Simmental and Angus bulls have received the same standard vaccination program. We will give our Simmental bulls a foot rot booster and a magnet for preventive hardware when we do a fertility check in mid April.

We welcome everyone to stop by the ranch any time to look at the bulls. After 50 years of breeding Simmentals, one of the highlights is all of the friends we have made in the cattle business. We always enjoy visiting and looking at cattle. You can also watch our homemade video on our web page (turn up the sound).

We can keep our Simmental bulls free of charge until the first of May. Then I will deliver them free of charge up to 300 miles. Registration papers will be transferred to the buyers.

We plan to do a DV Auction with Thyen's so if you are unable to attend the sale, you can watch and bid online. We will also take phone in bids.

Sincerely,
Dennis and Joanne Schmig

A QUICK REFERENCE TO AN EXPLANATION OF EPDs:

Expected Progeny Differences (EPDs) are the most accurate and effective tool available for comparing genetic levels. In using EPDs the differences between two sires EPDs represents the unit difference expected in the performance of the progeny. (Listed below are the units ASA EPDs are expressed in:)

Calving Ease (CE): Percent of unassisted births when used on heifers

Birth Weight (BW): Pounds of birth weight

Weaning Weight (WW): Pounds of weaning weight

Yearling Weight (YW): Pounds of yearling weight

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters

Maternal Milk (MM): Pounds of weaning weight due to milk

Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth

Stayability (STAY): Percent of daughters remaining in the cow herd at six years of age

Docility Score (DOC): The higher the number, the better the score

Carcass Weight (CW): Pounds of carcass weight

Yield Grade (YG): Yield Grade Score

Yield grade is an indication of the yield of red meat within a carcass. It is calculated by using several factors including: 1) fat thickness; 2) kidney, pelvic and heart fat; 3) hot carcass weight; 4) rib-eye area. A (-) EPD is better.

Marbling (MRB): Marbling score

Indexes: The last two columns in the EPD section are fairly new to the Simmental Breed, by interesting, they are \$ indexes. Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's were \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line.

All Purpose Index (API): It's exactly what it says, all purpose, this index includes every trait that can be calculated, calving ease, pounds at weaning and yearling keeping replacements back, milking ability and stayability, then the calf crop. It took into consideration some being retained as replacements, then the rest being fed off and sold grade and yield.

Terminal Index (TI): This index is to be used if all calves are going to a feedlot. It evaluates a sire for use only on mature cows with all calves put on feed and some grade and yield. No other factors were figured in.

Using API and TI, first determine which index to use, if you're breeding heifers and keeping replacements, use API, if all calves are going to the feedlot and finished, then use TI.

Welcome to Thyen Farms

I think last years sale day was about the beginning of life changing, stay home and being careful season! Tough times never last but tough people do.

Again this year we have several new sires in both breeds helping you get new bloodlines in year herd.

All the bulls are AI sired, we have over 150 paper cows so we were very selective of the bulls we kepted. We have been growing them up and not pushing to hard to allow them to be a herd sire for you for several years. Being younger bulls we will keep here like in the past, keeping them growing up, have them ready for service when you need them and deliver up to 250 miles.

We will have DV Auction sale day with the bull video on internet early March for your viewing. We will retain semen rights on all bulls. We are giving a \$50 coupon to buyers who walk thru the bulls before sale day.

For more information call Dan 605-520-5120, Nathan 605-881-0693 or Jim 605-520-8159.

Thank you,

Dan Thyen
