**Subject:** quote for 3430 trabue

**Wall rebuild and main-load beam replacement quote:**

35 feet wall rebuild  
23 feet main-load beam replacement  
6 intellijacks  
2 site work obstructions for electric remove and replace  
40 feet of basement gutter to existing pit  
permits/engineering

**total: \$48,174**

There is an existing sump pump and pit already in place. Upon next site visit, Levi and I will determine if it is operational. If not, there would be additional cost for sump pump/downspouts.

We are still working with engineers to see if we can take on the outside wall upstairs.

**Zach Hoffman**
