**100 Multiwave Locked System (MLS) Therapy Laser**

The innovative and patented Multiwave Locked System (MLS) Therapy Laser was developed in an effort to produce an efficient and simultaneous effect on pain, inflammation, and edema, exceeding the limits of traditional LLLT (low power) and concerns of HP (high power) laser therapy. This Mphi model is the most portable laser therapy solution. Provided complete with a convenient travel case, the Mphi is small and lightweight, making it easy to transport. Technical Features: 1 MLS® laser source, power up to 1.1W; 2 cm target area highlighted by high efficiency red LEDs; Back-lit graphic touch-screen display; MLS pulse modulation frequency from 1 to 2000 Hz with 1Hz steps; Power levels of 25%, 50%, 75% and 100%; Fixed or variable duty cycle; Treatment time from 1" to 99'59" in steps of 1"; Automatic calculation of the emitted energy according to the set parameters. FDA has approved the use of MLS Laser Therapy and it is also patented via the U.S. Patent Office. MLS Lasers are Class IV lasers with a peak power of 25 watts. The Laser Institute of America recommends having proper safety training before operating/purchasing a Class IV laser.
