<p>Description: In certain 2004 through early 2006 model year Prius vehicles, due to insufficient strength, a portion of the Steering Shaft Assembly may become loose or may develop a crack under certain operating conditions, such as when the wheel is turned forcefully to the locked position at low speed or the tire contacts roadside curbs while driving. If this condition has occurred on your vehicle, in some cases due to the components becoming loose and possibly rattling, an abnormal noise may be heard from the area of the Steering Shaft Assembly. The Steering Shaft Assembly consists of the Intermediate Shaft and Sliding Yoke which connects the steering wheel to the steering gear box.</p> <p>If this condition has occurred on your vehicle, in the worst case, you may lose vehicle steering control, thus increasing the possibility of a crash.</p> <p>Remedy: Any Toyota dealer will replace the Steering Intermediate Shaft at NO CHARGE to you. In addition, the dealer will inspect the sliding yoke and the intermediate extension shaft and replace them as necessary. Both inspection and if necessary, replacement of the sliding yoke and intermediate extension shaft will also be performed at NO CHARGE to you.</p>

		10/05/2009		Toyota Motor Sales, USA, Inc.	Manufacturer Safety recall issued NHTSA #09V388 Recall #90L SAFETY RECALL 90L - POTENTIAL FLOOR MAT INTERFERENCE WITH ACCELERATOR PEDAL Status: Remedy Available Locate an authorized Toyota dealer near you to

schedule an appointment

[Learn more about this recall](#)

Description: Toyota is recalling certain model year 2004-2010 passenger vehicles. The accelerator pedal can get stuck in the wide open position due to its being trapped by an unsecured or incompatible driver's floor mat.

A stuck open accelerator pedal may result in very high vehicle speeds and make it difficult to stop the vehicle, which could cause a crash, serious injury or death.

Remedy: Toyota filed an amended defect report on November 25, 2009, stating that dealers will modify the accelerator pedal and, on certain vehicles, alter the shape of the floor surface under the pedal. These changes address the risk of pedal entrapment due to interference with the floor mat. Redesigned accelerator pedals will become available beginning in April 2010 and dealers will replace any modified pedal with the new pedal if desired. Also, dealers will replace any genuine Toyota or Lexus all-weather floor mats with redesigned all-weather mats, or repurchase the previous mats from owners who do not want the new ones. Additionally, software modifications will be installed on Camry, Avalon and Lexus ES 350, IS 350 and IS 250 models that will ensure that the brake overrides the accelerator in the event both brake and accelerator pedals are applied. Toyota will begin mailing letters to owners on December 31, 2009. Owners may contact Toyota at 1-800-331-4331, Lexus at 1-800-255-3987.

10/24/2012		Pennsylvania Motor Vehicle Dept. Hatfield, PA Title #61435411SA02	Registration issued or renewed
11/14/2012		Toyota Motor Sales, USA, Inc.	Manufacturer Safety recall issued NHTSA #12V536 Recall #C0U SAFETY RECALL C0U REMEDY NOTICE - 2004 TO CERTAIN 2009 MODEL YEAR PRIUS VEHICLES HYBRID ELECTRIC WATER PUMP Status: Remedy Available Locate an authorized Toyota dealer near you to schedule an appointment Learn more about this recall

Description: Toyota is recalling certain model year 2004-2009 Prius vehicles manufactured August 6, 2003, through March 30, 2009 and FCHV-ADV vehicles manufactured December 12, 2008, through September 13, 2011. During manufacturing, a scratch may have occurred inside of the electrically driven water pump at the coil wire. The coil wire may corrode at the scratched portion.

The corroded coil wire may break and the water pump could stop. The corroded coil wire could cause a short circuit between coil wires and a possible open fuse, creating a stall-like condition of the hybrid system while the vehicle is being driven. This may increase the risk of a vehicle crash.

Remedy: Toyota will notify its owners, and dealers will replace the electric water pump, free of charge. The recall began on January 17, 2013. Owners may contact their Toyota dealer or the Toyota customer experience center at 1-800-331-4331.

11/14/2012		Toyota Motor Sales, USA, Inc.	Manufacturer Safety recall issued NHTSA #12V537 Recall #C0T SAFETY RECALL C0T - 2004 TO CERTAIN 2009 MODEL YEAR PRIUS VEHICLES STEERING INTERMEDIATE EXTENSION SHAFT Status: Remedy Available Locate an authorized Toyota dealer near you to schedule an appointment Learn more about this recall
------------	--	----------------------------------	---

Description: Toyota is recalling certain Model Year 2004-2009 Prius vehicles manufactured August 5, 2003, through March 30, 2009. The affected vehicles have a steering intermediate extension shaft assembly built with metal splines that complete the connection from the steering wheel to the steering gear. These splines may have been manufactured with an insufficient hardness.

Over time, the splines may wear and eventually fail resulting in a loss of steering ability, increasing the risk of a vehicle crash.

Remedy: Toyota will notify owners, and dealers will inspect the extension shaft and replace it if it is one with insufficient hardness, free of charge. The recall began during December 2012. Owners may contact their Toyota dealer or the Toyota customer experience center at 1-800-331-4331.

Glossary
View Full Glossary

First Owner
 When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

Manufacturer Recall
 Automobile manufacturers issue recall notices to inform owners of car defects that have come to the manufacturer's attention. Recalls also suggest improvements that can be made to improve the safety of a particular vehicle. Most manufacturer recalls can be repaired at no cost to you.

New Owner Reported
 When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.

Ownership History
 CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

Title Issued
 A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.

Toyota Recall / Service Campaign
 Toyota Motor Sales, USA, Inc. provides CARFAX with recall and service campaign information for vehicles originally marketed or sold in the United States of America, its territories, and Mexico. Only open safety or emissions recalls and service campaigns where the remedy has not been completed, will be listed. While Toyota provides data updates to CARFAX on a regular basis, this report may not include very recent activity. For the most current information on recall and campaign activity for any Toyota vehicle, you must go to <http://toyota.com/recall>.
